

FISHER & NORRIS' EAGLE ANVILS

Horseshoers'

The EAGLE ANVIL body is made of gun-metal—crystallized iron—which neither settles nor breaks. The face is in one piece of BEST TOOL CAST STEEL, welded on so perfectly by the process of its original and only inventor, the late Mr. MARK FISHER, that it is warranted never to come off. It is planed to a true surface, tempered with uniform hardness, and it always remains so. The steel horn is tough and unhardened, and will not break or bend. The complaint of deafness, so often occasioned by the "ringing" of the Anvil, is avoided by using the EAGLE ANVIL, which is warranted NOT TO RING.

N. B.—All EAGLE Anvils are now made with the latest Fisher Patent DOUBLE-THICK STEEL on both edges of the face, whole length.

SMALL ANVILS (MINIMS)

No.	Weight, pounds.	FACE. Length, inches.	Width, inches.	CUTTER-HOLE. Square inches.	HORN. Length, inches.	Each.
1	8	5 3/4	1 3/4	3/8	3 1/2	\$3.50

FISHER & NORRIS' DOUBLE SCREW PARALLEL LEG VISES

No.	Weight about 65 lbs., Jaw 4 1/2 x 1 in., Screws 1 1/8 in., Lever 13 in., opens 5 1/2 in.,	Each.
*2		\$10.50
3	90 " " 5 1/2 x 1 1/8 " " 1 1/4 " " 16 " " 6 1/2 " "	16.00
4	120 " " 6 1/2 x 1 1/4 " " 1 1/2 " " 19 " " 7 1/2 " "	20.50
5	150 " " 7 x 1 1/2 " " 1 3/4 " " 24 " " 9 " "	27.00
6	160 " " 8 x 1 1/2 " " 1 3/4 " " 26 " " 10 " "	30.00

* NOTE.—No. 2 Leg unnecessary, therefore omitted.

The Jaws are of best Tool Cast Steel, welded on, file cut and properly hardened. The Screws are forged of the best Refined Iron, and work in solid cut thread boxes. The lower screw maintains the parallel position of the two jaws, by having exact motion with the upper working screw, through the connecting chain which regulates it. The chain is very accurately made of steeled links and rivets, and, having no strain of the work upon it, is therefore as durable as all the other parts.
